

Humpback Whale

Habitat: Open oceans

Diet: Small fish and krill

Dangers: Humans & orcas

Adaptations: Blowhole on top; fins to swim; I swim in circles and blow bubbles to scare the krill into the center; then I swim up through the middle and gulp 15,000 gallons at once; then I use baleen to filter krill into my mouth; I use my tail to hurt orcas and migrate to warm waters to have my babies away from orcas

Kangaroo rat

Habitat: Deserts

Diet: Seeds & insects

Dangers: Coyotes, foxes, owls, snakes

Adaptations: I get almost all of my water from seeds; I dig holes to store my seeds; I live in burrows (tunnels); When I sleep, I keep my breath moist by breathing into my fur; I can jump up to 9 feet.

Okapi

Habitat: Tropical forests in central Africa

Diet: Leaves, grass, ferns, fruits

Dangers: Logging, hunting, mining, leopards

Adaptations: I use infrasonic calls to warn other okapi without predators hearing it; I have a 14-18 inch tongue to wash my eyes and ears; I eat over 100 different types of plants, and some are poisonous to other animals,

Little Brown bat

Habitat: Forests in North America; near water

Diet: Mosquitoes & other insects

Dangers: Hawks, snakes, cats, people

Adaptations: I can fly fast and turn quickly; I can echolocate dangers and bugs in the dark; I hibernate with others in caves during the winter; I sleep 20 hours a day to conserve my energy.
